

Lets clear the air

SUPREME 1100/2200

Electronic Air Purifiers

For the Leisure and Hospitality Industry
and Commercial Business Applications

50
Years of Indoor Air Quality

TRION®

Trion electronic air purifiers are designed to efficiently and effectively remove indoor pollution; they attract and retain pollutants like powerful magnets using the principle of electrostatic precipitation.

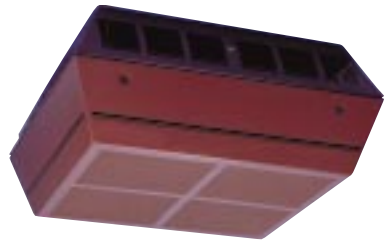

Millions of airborne dust, smoke and pollen particles - often so small they are invisible to the naked eye - are carried through the air to the Trion air purifier.

So efficient is the Trion electronic air purifier that up to 99% of airborne impurities that enter the unit are removed.

SUPREME 1100

SUPREME 2200

The Trion Supreme 1100 and Supreme 2200 units will suit pubs, bars, clubs, restaurants, offices and other areas where large volumes of air need to be cleaned.

Ideally centrally ceiling mounted, both models provide an even airflow distribution from all sides. Washable pre-filter and active charcoal after-filter are provided as standard as is Trion's unique arc suppression circuitry.

Both units are supplied with a 3-Speed hard wired remote control for convenience of operation, however infrared remote control is optional. Both Supreme models are available in either ivory or brown finish.
